

**To:** Joint Steering Committee for Development of RDA

**From:** Bill Leonard, CCC representative

**Subject:** **Date of expression - revision of RDA 6.10.1.1, 6.10.1.3**

CCC agrees with the intent of the proposal but suggests that "type" is an attribute of the date of expression and as such is "data about data." If this is the time to start addressing data about data, we would support examining the best treatment for attributes of elements established in RDA.

We also support the wording proposed by LC in *6JSC/EURIG/2/LC response* to be added to 6.10.1.1
