**Subject:** Musical arrangements: discussion paper

CILIP thanks EURIG for its discussion paper.

CILIP has not discussed the paper in detail, and lacks expertise in the area of specialized music cataloguing, but notes the proposals with interest and looks forward to opportunities for further discussion.

CILIP notes that, in general, the scope of RDA 6.28.1.5 Adaptations of Musical Works should be sufficient to accommodate the requirements of EURIG without mandating the specific instance of a composer's adaptation of their own work.
