

To: Joint Steering Committee for Development of RDA

From: Gordon Dunsire, CILIP Representative

Subject: Compilations of Works: Discussion paper

CILIP thanks EURIG for its discussion paper.

CILIP agrees with the proposed approach.

CILIP agrees in principal with the development of a controlled vocabulary for form of work, but would like to see more examples.

CILIP does not agree that a designator for Creator of compilation is required, because this relationship is covered by the designator Compiler.
