From: Bill Leonard, CCC representative

Subject: Alignment of ISBD and RDA Element Sets Appendix D

CCC thanks the ISBD Review Group for having undertaken the revision of Appendix D.1. We note that the revision did not include any changes to the textual instructions in D.1.2 for punctuation in ISBD Area 0.

CCC also adds that our proposal [6JSC/CCC/12](#), if approved, would impact this appendix. It suggests the addition of text taken directly from ISBD explaining an aspect ISBD punctuation practice not covered in RDA. This would result in the change of the name of instruction D.1.2.
