

To: Joint Steering Committee for Development of RDA

From: Alan Danskin, Chair, JSC

Subject: **Complete Examples Cover sheet**

These complete examples have been created to illustrate the application of RDA to bibliographic and authority data. Each example is expressed twice: as RDA elements and as encoded in MARC 21 format, using ISBD punctuation.

The following notation been used:

* indicates a core element

++ indicates elements which would be incorporated into the authorized access point

JSC proposes to add further examples in future, to illustrate the application of RDA to different resources and with alternative encoding schemes.
