## RDA Development

JSC continued to work with the co-publisher and IMT to address outstanding issues with the text, including user reported corrections.

The large number of documents reflects actions to address issues deferred until after publication and issues that have emerged during testing. ## Policies and Procedures

JSC reviewed and revised documents setting out policy and procedures. The revisions reflect the transition from development of a new standard the maintenance and development of an established standard and are subject to approval by CoP. Two specific proposals are worthy of specific notice:

- a fast track process to enable contentious amendments and revisions of RDA to bypass the full constituency review.
- a formal process by which the JSC Chair is appointed and succession is planned

## Implementation

Constituencies are awaiting the outcome of US RDA Test before committing to timeframes for implementation.

## Toolkit Development

JSC members and constituencies contributed to the development of the RDA Toolkit by testing and reviewing functionality.
