

# Application profiles and cataloging a manifestation

Gordon Dunsire, RDA Technical Team Liaison Officer  
Presented at RDA Toolkit Redesign Workshop  
Seattle, USA, 25 January 2019

# Application profiles

# Singapore framework (DCMI)

# Application profile

A specification of the metadata that is used in an application

A specification may include the entities, elements, and vocabulary encoding schemes that are used, and the mandatory and repeatable status of elements

May also include the preferred recording method

# Toolkit profiles

Elements specified by:

ID (local):

**ala-0dd63c0d-066f-3ddc-885a-ff83c25cf752**

URL (global):

**[https://beta.rdatoolkit.org/RDA.Web/Content?externalId=en-US\\_ala-0dd63c0d-066f-3ddc-885a-ff83c25cf752](https://beta.rdatoolkit.org/RDA.Web/Content?externalId=en-US_ala-0dd63c0d-066f-3ddc-885a-ff83c25cf752)**

# carrier type

## Definition and Scope

A categorization reflecting the format of the storage medium and housing of a carrier in combination with the type of intermediation device required to view, play, run, etc., the content of a manifestation.

 Element Reference

IRI

# Toolkit identifiers

Toolkit option IDs and URLs can also specify:

- Recording method

- RDA Vocabulary encoding scheme

Policy statements and Toolkit option IDs and URLs can also augment and specify:

- Options

- Non-RDA Vocabulary encoding scheme

Create Link

URL

# Template columns

| Column | Header             | Contents  |
|--------|--------------------|---|
| A      | Element label      | Hidden  |
| B      | Element ID         | Hidden  |
| C      | Element URL        | Formula: Hyperlink to Toolkit element           |
| D      | Recording method   | Method used to record element value             |
| E      | Value              | Value of the element for entity being described |
| F      | Provenance element | <b>Can be ignored</b>                           |
| G      | Provenance value   |   |
| H      | Notes              | Additional information                          |

# Element URL

A screenshot of the RDA Toolkit website. The top navigation bar is dark blue with "R | D | A TOOLKIT" on the left, and "Bookmarks and Notes" and "Documents" on the right. Below the navigation bar is a light blue header with "RDA Steering Committee" and four menu items: "ENTITIES", "GUIDANCE", "POLICIES", and "RESOURCES". The main content area has a white background with the title "carrier type" in large blue font. Below the title is the section "Definition and Scope" with a paragraph of text: "A categorization reflecting the format of the storage medium and housing of a carrier in combination with the type of intermediation device required to view, play, run, etc., the content of a manifestation."

# Element categories

| <i>Category</i>                     | <b>Definition</b>   |
|-------------------------------------|---|
| <b><i>General description</i></b>   | Common elements used to describe the entity [base application profile]                  |
| <b><i>Appellation</i></b>           | Elements used to identify (name) the entity   |
| <b><i>General relationships</i></b> | Common elements used to describe relationships of the entity [base application profile] |
| <b><i>Special description</i></b>   | Specialized elements used to describe the entity  |
| <b><i>Special relationships</i></b> | Specialized elements used to describe relationships of the entity                       |
| <b><i>Coherence</i></b>             | “Primary relationship” elements required for coherent WEMI metadata                     |

# Layered (nested) profile

**Coherent description of an information resource**

**Resource description entity**  
Minimum description of a resource entity

A coherent description following requirements  
A minimum requirements resource

**Effective description**

Effective description:  
general and specialized elements

Minimum description: appellation elements resource entity

Coherent description: "primary" relationship elements resource entity

# Data provenance

A single statement of element + value, or a set of such statements (“record”), is treated as a (metadata) Work

Data provenance is a statement about the statement  
= a statement about the (metadata) Work  
☞ a Work element + value

# Provenance elements

## Metadata statement Work

| Provenance element            | Provenance value example | Usage                            |
|-------------------------------|--------------------------|----------------------------------|
| Recording source              | Title page               | Transcription from manifestation |
| Source consulted              | LCNAF                    | Value from VES                   |
| Related manifestation of work | ISBD                     | Applied content standard         |
| Related work of work          | ISO 8601                 | Applied string encoding scheme   |

| Element URL   | Recording method | Value           | Provenance element   | Provenance value | Notes                      |
|---|------------------|-----------------|----------------------|------------------|----------------------------|

# Coherence

Linking the resource entities (WEMI) of a single information resource using “primary” relationships

Reliable linking values:

|   |        |
|---|--------|
| Authorized access point (local to a VES)      | Good   |
| Identifier (local to a VES)                   | Better |
| IRI (global, de-referencing gives provenance) | Best   |

| Element URL                                      | Recording method | Value   | Provenance element   | Provenance value | Notes |
|--|------------------|---|----------------------|------------------|-------|
| <b>General description</b>                       |                  |   |                      |                  |       |
| <a href="#">note on work</a>                     | Unstructured     |   |                      |                  |       |
| <b>Appellation</b>                               |                  |   |                      |                  |       |
| <a href="#">preferred title of work</a>          | Unstructured     |   |                      |                  |       |

# Workshop

# Workshop goals

Explore the layout and functionality of the new RDA Toolkit

Identify issues in the use of application profiles

Obtain feedback to improve the Toolkit

Have fun!

# Workshop activities

“Jane-athon” style

Collaborative working at tables

Leaders and roving experts

Morning session: we all catalogue the same examples of a simple monograph

Afternoon session: free selection from simple, special examples

# Using profile templates

Make a copy of a blank template

Name it your way

Augment or customize template

Add elements and entities

Choose recording methods

Mash-up parts of templates

E.g. Copy agent entity to WEM template

# Hints and tips

There is more than one way of creating an effective description

Not all entities or elements need to be used

Use appropriate recording methods

Try some alternative approaches

See the Toolkit guidance on  
“Resource description”

# Alarums and excursions

Broken links in Related elements ☹️

Break-out of Agent role elements

Specific elements for Collective Agent,  
Corporate Body, Family, and Person 😊

# Morning session examples

Manfred (Lord Byron)

A more noble cause (Emanuel & Tureaud)

# Thank you!

😊 Have fun! 😊
