RSC Assessment Group

• Formed as an outcome of the RSC April 2021 meeting

• Addresses issues beyond routine editorial decisions, which are often in the territory of broader questions and principles

• Membership
  ▪ RSC Secretary, RSC regional representatives

• Responsibilities of the group
  ▪ Analyzes the issue and then...
    o Refers it for action to an appropriate person or group (to create a proposal, fast track, etc.), or
    o Determines that the change cannot be accommodated in base RDA
Assessing and fixing these cases...

**Minimum description of an item**

A minimum description of an item must include the following set of elements:

- Item: appellation of item
  - or Item: title of item
    - or Item: preferred title of item
  - or Item: access point for item
    - or Item: authorized access point for item
  - or Item: identifier for item

- Item: manifestation exemplified with a value of:
  - Manifestation: appellation of manifestation
    - or Manifestation: title of manifestation
      - or Manifestation: title proper
    - or Manifestation: access point for manifestation
      - or Manifestation: authorized access point for manifestation
    - or Manifestation: identifier for manifestation
  - or IRI for a manifestation
A minimum description of an item must include one of the following elements:

- Item: appellation of item
- or Item: title of item
  - or Item: preferred title of item
- or Item: access point for item
  - or Item: authorized access point for item
- or Item: identifier for item
- or IRI for an item

A minimum description of an item must also include the following element:

- Item: manifestation exemplified with a value of:
  - Manifestation: appellation of manifestation
  - or Manifestation: title of manifestation
    - or Manifestation: title proper
  - or Manifestation: access point for manifestation
    - or Manifestation: authorized access point for manifestation
  - or Manifestation: identifier for manifestation
  - or IRI for an manifestation
Assessing more issues ...

• Person: **place of residence** – remove scope note “A place where a person has worked or studied is included”.

• Ongoing discussion on principle of “uniformity”. The objective of “internationalization” points to a wider issue:

  Given the flexibility of the guidance and recording methods, the metadata provided by different agents will not necessarily be identical, but as well-formed data it will be understood by any agent when shared. The emphasis is on data harmonization rather than strict compatibility.
Community Resources
Moving English language content to new location in Toolkit

- Sept. 2020: Abbreviations, capitalization, initial articles, etc.
- April 2021: Legacy Anglo-American instructions for pseudo-elements (legal, musical, religious works, and official communications)
- July 2021: Community refinements content, principally string encoding scheme instructions
Where it all began ...

Appendices
Original RDA Toolkit

- Appendices
  + A: Capitalization
  + B: Abbreviations and Symbols
  + C: Initial Articles
  + D: Record Syntaxes for Descriptive Data
  + E: Record Syntaxes for Access Point Control
  + F: Additional Instructions on Names of Persons
  + G: Titles of Nobility, Terms of Rank, Etc.
  + H: Dates in the Christian Calendar
Original RDA Toolkit: Capitalization, Abbreviations, and Symbols ...

... **English language conventions dominate**
Followed by other languages ...
New RDA Toolkit – under the RESOURCES tab
Community resources

This area of RDA toolkit holds content that conforms to the RDA standard but is specific to language or specialist communities rather than international in scope.

Community resources is subarranged into two areas:

- **Community refinements** provides additional guidance and instructions for existing RDA elements that are applicable to specific communities.
- **Community vocabularies** provides controlled terms for use as values of specific RDA elements using specialized community-based vocabularies or language-based vocabularies.
Landing page for *Community refinements*

Resources > Community resources > Community refinements

**Community refinements**

Community refinements provide more granular community-based refinements of RDA instructions to support string encoding schemes, transcription rules, and other string processing functions.

The refinements are not maintained as part of RDA, but are pertinent to RDA toolkit user communities.

Some refinements are legacy instructions that may have been used in RDA metadata statements in the past. Some are instructions that pertain to the formulation of a specific string encoding scheme.

- Work refinements →
- Expression refinements →
- Manifestation refinements →
- Person refinements →
- Corporate Body refinements →
- Family refinements →
- Place refinements →
Manifestation refinements

These refinements contain instructions for specific RDA elements for particular communities.

The refinements are not maintained as part of RDA, but are pertinent to RDA toolkit user communities.

Some refinements are instructions that pertain to the formulation of a specific string encoding scheme.

- authorized access point for manifestation: legacy Anglo-American instructions
- distribution statement: legacy Anglo-American instructions
- edition statement: legacy Anglo-American instructions
- manufacture statement: legacy Anglo-American instructions
- production statement: legacy Anglo-American instructions
- publication statement: legacy Anglo-American instructions
- series statement: legacy Anglo-American instructions
String encoding scheme – formulation of series statement...

series statement: legacy Anglo-American instructions

Recording

Recording a structured description

Apply this string encoding scheme:

Record a value that includes, in this order:

1. a value of Manifestation: title of series
2. a value of Manifestation: other title information of series
3. a value of Manifestation: statement of responsibility relating to series
4. a value of Manifestation: numbering within sequence

Apply a local string punctuation pattern.

EURIG Meeting
String encoding scheme – formulation of publication statement...

publication statement: legacy Anglo-American instructions

Recording

**Recording a structured description**

Apply this string encoding scheme:

Record a value that includes, in this order:

1. a value of Manifestation: place of publication
2. a value of Manifestation: name of publisher
3. a value of Manifestation: date of publication

Apply a local string punctuation pattern.
Landing page for Community vocabularies

These vocabularies contain controlled terms for use as values of specific RDA elements.

The vocabularies are not maintained as part of RDA, but are pertinent to RDA toolkit user communities.

Some vocabularies may have incomplete coverage, or lack definitions or notations.

Some are legacy vocabularies that contain terms that may have been used in RDA metadata statements in the past.

Names of RDA entities

Apply the following guidance when recording a value of RDA Entity: name of RDA entity or element subtype.

Initial articles of names of RDA entities in French

Treat the following words and prefixes as initial articles.

- l'
- la
- le
- les
- un*
- une*

An asterisk (*) indicates that the same form may be used in other contexts so that care should be taken to determine the meaning before treating the word as an initial article.
From AACR2 to the new RDA Toolkit

AACR2 – Appendix A for Capitalization [English language context]

A.28 SOIL NAMES

A.28A. Capitalize the name of a soil classification.

Alpine Meadow
Chernozem
Half Bog
Prairie

New RDA Toolkit – Capitalization of manifestation statements in English [language: English; entity: Manifestation]

Capitalize a name of a soil classification.
Where are the examples?

AACR2 – Appendix A for Capitalization [English language context]

New RDA Toolkit – Capitalization of manifestation statements in English [language: English; entity: Manifestation]
Community Resources – Further Refinements and Vocabularies

- Normalizing data found in manifestations (capitalization, etc.)
- Access point construction (string encoding schemes)
- Community vocabularies (e.g., Gender)
- Extensions to carrier and content type (see the “how-to” guidance for making these)
- Subtypes of RDA entities and elements (including new “shortcut” relationship elements)
- Community application profiles
- Suggested friendly labels for elements
Where we stand today with community resources...

For the Anglo-American catalog(u)ing community

... by the Anglo-American catalog(u)ing community
Community Resources has content – Now What?

• Hand off “ownership” from RSC to other groups
  ▪ For English: some Anglo-American community (or group of communities)
    o NARDAC + ORDAC + British Library, etc.? [not yet settled]
  ▪ For Finnish:
    o Ready to translate the English text of Community Resources for their purposes

• Communities implementing Community Resources need to
  ▪ Figure out how this part of RDA Toolkit works for them in concert with base RDA, policy statements, application profiles, etc.
  ▪ Commit to regular review and revision
  ▪ Ensure the content remains compatible with RDA
  ▪ Update the CMS (Content Management System), or provide content for someone else to add
Thank you!
