**Abstract**

The proposal condenses *RDA* 6.28.1.9–6.28.1.10 into a single instruction for making additions to authorized access points representing musical works.

**Justification**

The RSC tasked the Music Working Group with examining and revising the instructions for recording medium of performance in *RDA* 6.15 and *RDA* 6.28.1.9.1. In its examination of 6.28.1.9.1, the working group concluded that a consolidation of 6.28.1.9–6.28.1.10 was warranted.

**Issues requiring resolution**

At the JSC meeting in November 2015, the Music Working Group agreed to examine how medium of performance was treated in access points as part of its examination of *RDA* 6.15 (see 6JSC/MusicWG/11/rev). At issue was the reference in *RDA* 6.28.1.10 to add medium of performance to an access point that included a distinctive title by following the instructions for adding medium of performance to access points that included a type of composition at *RDA* 6.28.1.9.1.

In order to resolve this problem, the Working Group concluded that the best course of action was to consolidate *RDA* 6.28.1.9 and 6.28.1.10 into a single instruction. This has the benefit of making it clear in a single instruction what additions are available for disambiguation.
In its consolidation, the Working Group have retained the following concepts for making additions to access points representing musical works:

1) additions of medium of performance, numeric designation, and key (in that order) are always made for works with a preferred title consisting solely of one or more types of composition.
2) additions of any kind may be made for purposes of disambiguation
3) the placement of Selections
4) the Exceptions for adding medium of performance to an access point, along with the Alternative to apply the Exceptions according to the policy of the agency creating the data.

Concept 4 has proven to be the most contentious in formulating this proposal. Discussions early on considered removing the Exceptions entirely. It was felt by some that if the idea of “on-the-fly” access point construction was to be feasible, continuing to maintain elaborate instructions for adding the medium to an access point would be a problem. Others argued that specific instructions for adding medium of performance were no different in complexity from many other access point instructions in RDA. Why should music access points be treated differently? In the end, the Working Group decided to keep the Exceptions for adding medium of performance to an authorized access point, along with the Alternative to apply the Exceptions selectively. We believe this represents the best way forward for dealing with this issue. It allows those who wish to maintain past practices to do so, while at the same time allowing for different, future practices.

There have been some modifications to the Exceptions that are a result of the work on RSC/MusicWG/3, the replacement of RDA 6.15. These changes were made in order to produce access points that are similar to those currently being done, despite the changes made to RDA 6.15. These include an additional Exception to not add the number of parts or performers if there is only one part for a particular voice, instrument, or ensemble (Exception b), an Exception to not add the total number of performers or ensembles (Exception e), and finally an Exception for using the term “voices” followed by the number of parts when the medium of performance cannot be determined, but the number of parts can be (Exception k)).

**Impact of the revisions**

As this is a consolidation of the instructions previously present at 6.28.1.9 and 6.28.1.10, there should be no changes to how additions are made to authorized access points representing musical works.
Changes
No marked-up version provided; clean copy only. Completely replaces 6.28.1.9, its sub-instructions, and 6.28.1.10.
In cases where examples have been provided, they have been taken directly from RDA 6.15.1.11.4, 6.28.1.9 and 6.28.1.10

6.28.1.9 Additional Elements in Authorized Access Points Representing Musical Works

Include additional elements in authorized access points for a musical work if:

the preferred title for the work (see 6.14.2) consists solely of the name of a type, or two or more types, of composition

or

the elements are needed to distinguish the access point from one that is the same or similar but represents a different work

or

the elements are needed to distinguish the access point from one that represents a person, family, corporate body, or place.

Include one or more of the following elements, as appropriate:

a) medium of performance (see 6.15)
b) numeric designation of a musical work (see 6.16)
c) key (see 6.17)
d) form of work (see 6.3)
e) date of work (see 6.4)
f) place of origin of the work (see 6.5)
g) other distinguishing characteristic of the work (see 6.6).

If the preferred title for the work consists solely of the name of a type, or of two or more types, of composition, always include the medium of performance, numeric designation of a musical work, and key (in this order), as applicable.

For a compilation of musical works, record the conventional collective title 
*Selections* following medium of performance, numeric designation of a musical work, and/or key, but before form of work, date of work, place of origin of work, and/or other distinguishing characteristic of the work, as applicable.
When recording the medium of performance, apply the additional instructions at 6.28.1.9.1, as applicable.

6.28.1.9.1 Medium of Performance

Add the medium of performance as applicable, in this order:

a) voices
b) keyboard instrument if there is more than one non-keyboard instrument
c) the other instruments in score order
d) ensembles
e) continuo.
