Addendum to the March 2022 Release Notes

This release of RDA Toolkit includes significant additions and changes to RDA content. Following RSC approval of two substantive proposals:

- 69 new elements were added
- 2 new vocabulary encoding schemes were added (collection accrual method and collection accrual policy)
- 58 elements were deprecated
- 35 element labels were changed.

In addition, shortcut and soft-deprecation text was added to a number of elements. There are some adjusted definitions, new terms in the Glossary, changes in the LRM alignment, and changes to element hierarchies (broader and narrower elements). For specific information on these changes, see RSC/TechnicalWG/2020/1/RSCDecisions/rev and RSC/TechnicalWG/2020/2/RSCDecisions/rev. What follows is a list of elements either introduced, deprecated, or revised in relation to the two referenced proposals.
